

As part of our ongoing EVOLVE initiative to enhance and advance our processes, AGR Assignment is committed to providing informative updates regarding the new application response time.

My Applications New Response Time:

Effective Immediately: AGR Management has updated the standard response time for MyVector inquiries submitted through My Applications from 10 duty days to 15 duty days, calculated from the date of the member's last inquiry. This adjustment reflects the need to account for non-duty days—such as weekends, federal holidays, and pass days—and addresses increased quotas and workload. By extending the timeline, we aim to improve transparency, reduce delays and confusion, and set clear, consistent expectations for all members using the system.
